CAMP HIGHLIGHTS

Campers dove into creativity this week as they explored the wonders of freshwater ecosystems. With imagination and hands-on crafting, each camper built their own river diorama—complete with winding streams, wildlife, and riverbank plants.

This week we kicked off Teen Camp, where our older campers get a special behind-the-scenes look with our animal husbandry team—learning what it takes to care for aquatic life like real aquarists in training!

Campers got hands-on with aquatic habitats by designing their very own mini fish aquariums! Using craft materials, gravel, and plenty of creativity, they built tiny underwater worlds filled with colourful fish and plants. Here's one camper proudly showing off their fin-tastic creation—what a splash of fun!
